

himself₂₇ Moisturiser 110ml

To complete your daily program apply your moisturiser.

Essential for skin hydration, daily moisturising will help your skin look and feel healthy and vibrant. It will help combat the signs of early ageing, cool and calm the skin.

The extraordinary properties of Aloe Vera, Shea Butter, Sweet Almond oil, Green tea extract, vitamins C, E and Pro-Vitamin B5 and Lemongrass extract, combine to produce an effective, light and refreshing daily moisturiser that will help your skin combat today's stressful, unforgiving and harsh environment.

Active ingredients

Preservative content below is approved by the Soils Association

Phenoxyethanol is an organic chemical compound, a glycol ether often used in dermatological products such as skin creams. It is a colourless, oily liquid. It is a bactericide also used as a fixative for perfumes, an insect repellent, a topical antiseptic, used in preservatives, pharmaceuticals, and in organic synthesis. It is moderately soluble in water. It is also listed as an ingredient for many United States vaccines by the Centre for Disease Control.

Benzyl alcohol is an organic compound. Benzyl alcohol is a colourless liquid with a mild, pleasant aromatic odour. It is a natural constituent of a variety of essential oils including jasmine, hyacinth, and ylang-ylang.

Potassium sorbate is the potassium salt of sorbic acid. It is used to inhibit moulds, yeasts and microbes. It can be found in the ingredients list of many herbal dietary supplement products and is used in quantities at which there are no known adverse health effects. Also, it is used in many personal care products to inhibit the development of microorganisms for shelf stability. Some manufacturers are using this preservative as a replacement for parabens.
