

# himself<sup>27</sup> Oil Control 50ml

An intensive oil and blemish controlling treatment using the finest natural ingredients and botanical extracts.

Witchhazel, Tea Tree leaf Oil, Rosemary, Cinnamon enriched with protein helps to reduce the appearance of oily and acne affected skin.

Our daily facial routine is specifically developed to deeply cleanse and decongest pores and to help control oily and inflamed skin. The combination of effective ingredients helps to clear and control the skin in a natural way.

## Active ingredients

**Witchhazel extract.** Astringent / soothing / skin conditioning.

**Cinnamon.** Tonic /cleansing / refreshing.

**Rosemary.** Antioxidant / soothing

**Olive leaf extract,** Skin conditioning

**Tea tree leaf oil,** Antimicrobial (a substance that kills or inhibits the growth of microbes such as bacteria, fungi, or viruses)

**Lavender oil.** Soothing/good for acne and treatment of skin conditions.

**Aloe vera.** Anti inflammatory/rich in vitamins, minerals and amino acids.

**Directions:** for best results apply onto clean skin before any other treatment to affected area (generally the T-Zone).

**Ingredients:** Deionised Water (Aqua), Hamamelis Virginiana (Witchhazel) Extract, Butylene Glycol, Soja Glycine Phospholipids, Capryloylglycine, Cinnamomum Zeylanicum Extract, Rosmarinic Acid, Saccharomyces cerevisia (Yeast) Cell Extract, Equisetum Arvense (Horsetail) Extract, Niacin, Olea Europaea (Olive) Leaf Extract, Sodium Hyaluronate, Triticum Vulgare (Wheat) Germ Extract, Polysorbate 80, Humulus Lupulus (Hops) Extract, Copper Gluconate, Glycine, Zinc Gluconate, Lactic Acid, Aloe Barbadensis, Magnesium Aspartate, Melaleuca Alternifolia (Tea Tree) Leaf Oil, Pinus Taeda (Pinetree) Extract, Salicylic Acid, Xanthan Gum, Triclosan, Phenoxyethanol, Potassium Sorbate, Ethylhexylglycerin, Lavandula Angustifolia Oil, Citrus Medica Lemonum (Lemon) Peel Oil, Tetrasodium EDTA.

**Preservative content below is approved by the Soils Association.**

**Phenoxyethanol** is an organic chemical compound, a glycol ether often used in dermatological products such as skin creams. It is a colourless, oily liquid. It is a bactericide also used as a fixative for perfumes, an insect repellent, a topical antiseptic, used in preservatives, pharmaceuticals, and in organic synthesis. It is moderately soluble in water. It is also listed as an ingredient for many United States vaccines by the Centre for Disease Control.

**Benzyl alcohol** is an organic compound. Benzyl alcohol is a colourless liquid with a mild, pleasant, aromatic odour. It is a natural constituent of a variety of essential oils including jasmine, hyacinth, and ylang-ylang.

**Potassium sorbate** is the potassium salt of sorbic acid. It is used to inhibit moulds, yeasts and microbes. It can be found in the ingredients list of many herbal dietary supplement products and is used in quantities at which there are no known adverse health effects. Also, it is used in many personal care products to inhibit the development of microorganisms for shelf stability. Some manufacturers are using this preservative as a replacement for parabens.
