

# himself<sub>27</sub> Anti Age 50ml

Stress, pollutants and environment all have an effect on the condition and appearance of our skin. himself<sub>27</sub> Anti age contains antioxidants, green tea, amino acids, vitamins A, C and E which all contribute to a high quality, natural combatant to help boost cellular activity and strengthen cell membranes while providing the complexion with a new energy.

Retinyl Palmitate (vitamin A) is a powerful free-radical scavenger that helps reverse UV damage, aid healthy skin cell production, and improve elasticity for a firmer, more youthful-looking complexion. Combined with Co-Enzyme Q 10 (ubiquinone), a vitamin-like anti-oxidant, helping to hold back and reduce the signs early aging.

**Preservative content** below is approved by the Soils Association

Phenoxyethanol is an organic chemical compound, a glycol ether often used in dermatological products such as skin creams. It is a colourless, oily liquid. It is a bactericide also used as a fixative for perfumes, an insect repellent, a topical antiseptic, used in preservatives, pharmaceuticals and in organic synthesis. It is moderately soluble in water. It is also listed as an ingredient for many United States vaccines by the Centre for Disease Control.

Benzyl alcohol is an organic compound. Benzyl alcohol is a colourless liquid with a mild, pleasant, aromatic odour. It is a natural constituent of a variety of essential oils including jasmine, hyacinth, and ylang-ylang.

Potassium sorbate is the potassium salt of sorbic acid. It is used to inhibit moulds, yeasts and microbes. It can be found in the ingredients list of many herbal dietary supplement products and is used in quantities at which there are no known adverse health effects. Also, it is used in many personal care products to inhibit the development of microorganisms for shelf stability. Some manufacturers are using this preservative as a replacement for parabens.
