

himself₂₇ Cleanse 110ml

A refreshing oil-free, self foaming herbal cleanser to thoroughly cleanse the skin.

With just a few drops of water, this self foaming cleanser creates a soap-free cleansing agent containing anti-irritants, Coconut, Thyme Extract, Aloe Vera, Rosemary Extract and Ginkgo Biloba Extract to support proper cleansing. Calendula Extract, Wasabi Root Extract, Goldenseal and Liolenic Acid help prepare the skin to improve the skin texture and Vitamin E to help keep pH balanced.

Preservative content below is approved by the Soils Association

Phenoxyethanol is an organic chemical compound, a glycol ether often used in dermatological products such as skin creams. It is a colourless, oily liquid. It is a bactericide also used as a fixative for perfumes, an insect repellent, a topical antiseptic, used in preservatives, pharmaceuticals and in organic synthesis. It is moderately soluble in water. It is also listed as an ingredient for many United States vaccines by the Centre for Disease Control.

Benzyl alcohol is an organic compound. Benzyl alcohol is a colourless liquid with a mild, pleasant, aromatic odour. It is a natural constituent of a variety of essential oils including jasmine, hyacinth, and ylang-ylang.

Potassium sorbate is the potassium salt of sorbic acid. It is used to inhibit moulds, yeasts and microbes. It can be found in the ingredients list of many herbal dietary supplement products and is used in quantities at which there are no known adverse health effects. Also, it is used in many personal care products to inhibit the development of microorganisms for shelf stability. Some manufacturers are using this preservative as a replacement for parabens.
